# CompMatrix Anesthesiology A Decision Making Tool for Residency Selection Jeffrey M. Taekman, M.D.

Bryan Andregg

Choosing residency is one of the most important decisions you will ever make. Despite the importance of this task many individuals rely on soft, subjective citiens to make their final decision. Every program has its own strengths and weaknesses. How does one know if a program is appropriately suited to their needs? The Compiliating ( http://aneswebman.mc.duke.edu/compinating() is a decision making tool designed to objectify the process of selecting a residency. The CompMatrix will allow you to:

- Choose, with confidence, the best residency for your needs. Compare different programs taking into account both strengths and weaknesses. Streamline your interviewing process.

In a nutshell, you will be asked to select and weight the factors you consider important in choosing your residency. You will then be asked to rate each program based on your chosen criteria. The CompMatrix generates a table with an overall score for each program that reflects the strengths and weaknesses of each program weighted towards your own preferences:

The CompMatrix was developed by Jeffrey M. Taekman, M.D. and Bryan Andreggrat the Duke University Medical Centers

The following are detailed instructions on how to use this new resource.

#### Establishing an Account

Your first task will be to set up a username and password. This information as well as your weighting and ratings are completely anonymous. The user name and password will be known only to you. WARNING: IF YOU FORGET YOUR USERNAME OR PASSWORD, YOU WILL BE UNABLE TO RETRIEVE YOUR DATA. We suggest you choose something meaningful and write down both username and password in a safe location.

If this is your first time visiting the CompMatrix choose a username and password and type them in the appropriate box. Click on the *New Account* button and retype your password. Hit the *submit* button, If you tried to choose a username that already exists in the system OR you did not type the same information for your password each time, you will be prompted to make a correction.

Choosing your Criteria

After establishing an account you'll be looking at the criteria selection page. We have chosen dose to 100 possible criteria that might go into your decision when choosing a residency. You may choose as many or as few criteria under each heading as you like. To select multiple criteria hold the ctrit key down and click on each criteria (Command key on a Machitosh).
